ED.M. PROGRAM IN ELEMENTARY EDUCATION

I. PROGRAM DESCRIPTION: The 30-credit master's program in early childhood/elementary education is intended for certified teachers who wish to continue their study of learning and teaching in early childhood/elementary settings. The program has five major goals:

1. to foster a vision of learning as an active process in which students construct their own knowledge and understandings;
2. to foster a vision of teaching that promotes depth of understanding and problem solving rather than mere curriculum coverage and that recognizes children’s individual and cultural differences;
3. to extend teachers’ knowledge of current research and theory on learning and teaching so they can make informed decisions about educational practice and can help to bring about change in schools;
4. to encourage teachers to be teacher-researchers who reflect on and systematically inquire into their own practice; and
5. to provide an opportunity for teachers to acquire depth in an area of early childhood/elementary education that is of particular interest to them.

II. APPLICATION DEADLINES:
Fall admission - February 1 deadline
Spring admission - November 1 deadline

III. APPLICATION REQUIREMENTS: To be considered for admission to the program, applicants must provide the following before the deadline:

1. Personal statement
2. Three letters of recommendation
3. Current Graduate Record Exam (GRE) scores
   (Any test scores submitted must be less than 5 years old as of the application deadline. Scores must be official, not self-reported.)
4. Undergraduate and graduate transcripts

VI. PORTFOLIO: To demonstrate the achievement of the goals of the program each student will create a portfolio with three components.

- Part A: Students will write a reflective essay where they will describe the key knowledge that they have developed in the areas of Early Childhood Education, Elementary Education, and their area of specialization.
- Part B: Students will compile relevant artifacts from coursework that demonstrate changes in knowledge, beliefs, and practice related to their identified goals. Each artifact will include a reflective essay that clearly indicates how this artifact demonstrates what the student has learned about their practice and what they still hope to change and develop.
- Part C: Students will create a “future directions” plan that identifies areas for improvement including additional knowledge and skills the student wishes to develop.

Taken as a whole the portfolio should demonstrate deep knowledge of core topics and an ability to synthesize and analyze research in early childhood and elementary education. The portfolio will be evaluated by the student’s advisor and one other member of the program faculty.
