PH.D. IN HIGHER EDUCATION

I. PROGRAM DESCRIPTION: The Ph.D. in Higher Education at Rutgers University offers focused study of the complexities of colleges and universities, their missions, contexts, challenges, and successes. This interdisciplinary degree program brings together distinguished higher education scholars representing the Graduate School of Education (GSE), the Bloustein School of Planning and Public Policy (BSPPP), the School of Arts and Sciences (SAS), the School of Communication and Information (SCI), the School of Environmental and Biological Sciences (SEBS), and the School of Management and Labor Relations (SMLR). Affiliated faculty members are higher education experts in the fields of, for example: education, law, communication, organizational studies, public policy, and economics.

The Ph.D. in Higher Education program prepares higher education researchers who will take their scholarship, knowledge, and research skills into a range of higher education settings such as universities and colleges, state or federal governing and coordinating boards, independent research and policy organizations, and foundations.

VI. QUALIFYING EXAM: The qualifying examination assesses students’ knowledge of the field of higher education including capacity to conduct original research in a specific area of inquiry. Each qualifying examination requires a faculty committee of three members, who provide feedback and indicate an overall level of achievement (exceptional, high pass, pass, unsatisfactory) both in writing and at an evaluation meeting with the student.

VII. DISSERTATION: Each candidate for the doctorate pursues, under faculty direction, an original investigation of a problem or problems in a field of concentration and presents the results of the investigation in a dissertation. This doctoral work is completed in a minimum of 24 credits of research course work. Before embarking on this original investigation, students must have their dissertation committee approve a proposal that describes research questions and the methods used to address those questions.
