Join Rutgers Graduate School of Education in welcoming Dr. William Tate IV, Dean of the Graduate School and Vice Provost for Graduate Education and Edward Mallinckrodt Distinguished University Professor in Arts and Sciences at Washington University.

William F. Tate IV is the Edward Mallinckrodt Distinguished University Professor at Washington University in St. Louis. Tate’s research program has focused on the social determinants of mathematics performance. His co-edited book project titled, Research and Practice Pathways in Mathematics Education: Disrupting Tradition captures this interest. Tate has a particular interest in STEM attainment. Ongoing research projects include understanding the distal and social factors that predict STEM doctoral degree attainment. His co-edited book titled, Beyond Stock Stories and Folktales: African Americans’ Paths to STEM Fields captures the direction of this research program. Tate’s research has focused on the development of epidemiological and geospatial models to explain the social determinants of education attainment and well-being. His book project titled, Research on Schools, Neighborhoods, and Communities: Toward Civic Responsibility reflects this interest. Professor Tate is a past president of the American Educational Research Association (AERA). He received a presidential citation from AERA for “his expansive vision of conceptual and methodological tools that can be recruited to address inequities in opportunities to learn.” A fellow of AERA, he has received the Distinguished Contributions to Social Contexts in Education Research-Lifetime Achievement Award (AERA-Division G). He is an elected member of the National Academy of Education.

Tuesday, January 31st, 2017
1:30 PM
GSE Lecture Hall, Room 124
