

Education as a Social Science

undergraduate minor

Purpose:

The *Education as a Social Science Minor* is designed for students interested in investigating learning and teaching in a broad range of human contexts. This minor takes a multi-disciplinary approach to the study of educative practices and is premised on several key assumptions:

- Learning and teaching are fundamental human and cultural processes.
- Education is intimately bound up with social, cultural, economic and political systems.
- Reflection and inquiry are powerful tools for exploring teaching and learning in all human contexts.

Through a minor in Education, students will examine each of these assumptions by investigating educative practices in and outside of formal settings. There are many ways in which a student can complete the minor.

1. **Educational Policy and Social Justice.** This concentration will permit students to focus on issues related to the history of American education, race and American schools, and queer issues in schools.
2. **Creativity and Play.** This concentration will permit students to focus on creativity and imagination in professional settings, the arts and the young child, and the role of play in education.
3. **Global Education.** This concentration will provide students with grounding in the areas of global education, issues of migration and education, and comparative education across countries.
4. **Exceptional Learners.** This concentration provides students with knowledge of both gifted education and education for students with learning disabilities.
5. **Digital Learning.** This concentration will permit students to learn about education and computers, digital games and learning, and other topics related to learning in digital learning environments.
6. **Community Studies and Civic Engagement.** This concentration is for students interested in educational leadership in informal learning settings, such as museums and community organizations.
7. **General Studies.** This concentration will allow students to take a menu of courses in education tailored to one's own interests; this concentration is also appropriate for students in our five-year urban teacher education program.

NOTE: THIS MINOR IS NOT A PATHWAY TO NEW JERSEY TEACHER CERTIFICATION. Students interested in teaching careers in public schools should examine the certification programs offered by the Graduate School of Education (GSE).
