Graduate School of Education

Ethical AI: Choosing Tools for Deep Learning

Thursday @ 4PM
April 23rd

During this 60-minute webinar, participants will learn about the main types of AI and their respective benefits, risks, and safeguards. Participants will collaborate in breakout groups to generate strategies that ensure high-level learning when using AI.

Participants will learn how evaluate AI systems in terms of their potential risks to students and develop pedagogical strategies that promote deep learning with AI resources.
