NGSS Mastery: Leveraging AI for Science Growth

Thursday @ 4PM
May 21st

During this 60-minute webinar, participants will explore Inq-ITS (Inquiry Intelligent Tutoring System) and its dashboard, Inq-Blotter, a patented AI-based platform designed to support instruction, formative assessment, and personalized learning for middle and high school students developing NGSS science competencies. Participants will also learn about NGSS-based assessment and how Inq-ITS can support teachers' pedagogical practices while enhancing students' science learning.

[REGISTER HERE](#)

Takeaways:

- ✓ Participants will learn how to implement real-time instruction and assessment of NGSS practices.
- ✓ Identify specific learning gaps to help middle and high school students master complex science competencies
- ✓ Track student inquiry and progress via digital dashboards to provide immediate, personalized feedback
