# Responsible AI in the Classroom: Tools, Strategies, and Best Practices

Thursday @ 4PM  
May 7th

During this 60-minute webinar, participants will examine practical ways AI can assist with lesson development, resource creation, and differentiation while maintaining educator expertise and human-centered learning. The session will also highlight key considerations for ethical use, helping educators integrate AI tools in ways that support meaningful learning and responsible practice.

[\*\*REGISTER HERE\*\*](#)

## Takeaways:

- ✓ Learn strategies for integrating AI responsibly in educational settings, with attention to accuracy and educator oversight.
- ✓ Explore examples of AI tools that may help streamline instructional planning while keeping human-centered teaching and learning at the forefront.
- ✓ Develop ideas for incorporating AI into teaching contexts, leaving with actionable approaches participants can begin applying in their classrooms or learning spaces

**Webinar Hosted by  
Marlee Bunch and Michelle Hill**
